

Identification Services Bureau achieved Information Security Management System certification

The Identification Services Bureau (DSI)'s Information Security Management System BS7799 certification was awarded by the British Standards Institution in January 2006. With high level of proficiency in the Information Security Management System, DSI made a transition to meet the standard of ISO27001:2005 and was awarded the certification of ISO27001:2005 by the British Standards Institution on 4 May 2007.

In 2013, the International Organization for Standardization released a new version standards ISO27001:2013, and DSI was successfully accredited with the certificate of Information Security Management System ISO27001:2013 in 2015. In 2022, the International Organization for Standardization updated the standards with the Information Security Management System standards ISO27001:2022, which raised the requirements on the system. DSI was successfully accredited with the certificate of ISO 27001:2022 in 2024.

DSI implemented the Information Security Management System in businesses of electronic identity card, travel documents and criminal records and established a management system in compliance with ISO27001 standards. DSI will keep on improving to attain the world state-of-the-art information security management level, ensuring that DSI is capable to effectively cope with and manage risks in information security, rigorously monitor the document production process and safeguard citizens' personal information.
